# Household Hazardous Waste Tips

Household products should never be poured down a sink, storm drain, or ditch. What's under our kitchen sink or in the garage can be hazardous to people and our water. Help keep our rivers, lakes, and beaches clean by knowing how to handle your household waste.

## Which products are hazardous?

- Automotive: Oil, transmission fluid, gasoline/diesel fuel
- Home improvement: Oil-based products, glue, rust remover, paints and furniture strippers
- Pesticides/weed killers
- Cleaning Products: Tub and tile, oven
- Medical Items: Old medication, syringes/needles
- Other: nail polish, hair relaxer, mercury thermometer, alcohol-based lotion, prescription medication, aerosol cans

## How do I dispose of my products?

- Never dump household hazardous waste down storm drains, sinks, or on the ground. Take them to a recycling location.
- A map of disposal sites can be found on Michigan Department of Environmental Quality's (MDEQ) website [https://www.michigan.gov/deq/0,4561,7-135-3312\\_4118-70304--,00.html](https://www.michigan.gov/deq/0,4561,7-135-3312_4118-70304--,00.html).

## How do I store my products?

- Keep unused products in their original containers with their label intact.
- Keep all lids and caps on and tightly closed. Store products inside dry, cool areas, away from kids and pets.
- Only buy what you need and maintain a small inventory.
